

European eHealth Strategy and Deployment of Interoperability in eHealth Services

Marcello Melgara – Lombardia Informatica S.p.A.

- **European Actions on Cross-Border Interoperability**

Michiel Sprenger, JAseHN, Senior Advisor Nictiz, NL

- **Cross-Border ehealth Services (eDSI) Deployment in Europe**

Licínio Kustra Mano, EC, eHealth Interoperability Consultant, DG Santé

- **Panel Discussion**

European eHealth Strategy and Deployment of Interoperability in eHealth Services

Panel Discussion

- 1) Gerald Cultot (EC DG Connect, BE): **EC view on R&I and support to deployment**
- 2) Michiel Sprenger (JAseHN, Nictiz, NL): **eHN / JAseHN medium long term eHealth strategy**
- 3) Mie Hjorth Matthiesen (Trillium II, MedCom, DK): **Scaling up use of patient summaries**
- 4) Robert Stegwee (eStandards, Expert, NL): **Toward collaborative standards development**
- 5) Vincent Van Pelt (XDS metadata Work Group, Nictiz, NL): **Seamless interoperability - IHE**
- 6) Karima Bourquard (EUROCAS, IHE-Europe, FR): **Conformance and public procurement**
- 7) Licinio Kustra Mano (CEF eHDSI Solution Provider, EC, BE): **Deploy the past and the future**
- 8) Marcello Melgara (ASSESS-CT, openMedicine, VALUeHEALTH, Lispa, IT): **Wrap up**

European eHealth Strategy and Deployment of Interoperability in eHealth Services

- Exploit tools and opportunities offered by EC to build interoperating services through innovation
- In line with eHealth Member States and Stakeholders policies and strategies (eHN/JAseHN)
- Scaling up the scope and the use of interoperable clinical documents (Trillium II)
- Based on harmonised international standards (eStandards)
- To allow a seamless interoperability (IHE – HL7)
- And trustable adoption of solutions, based on transparent public procurement (EURO-CAS)
- Exploiting the CEF eHDSI infrastructure as a content unaware transport (CEF eHDSI)
- To deploy new services of increased value, also through new institutes (VALUeHEALTH)
- Base on unified terminologies, to communicate clinical contents (ASSESS-CT)
- Adopting a unified worldwide way of identify medicinal products based on ISO IDMP (openMedicine)
