

Lapo Bertini Reappointed as Vendor Co-Chair

Press Release.

IHE-Europe is proud to announce the reappointment of Lapo Bertini (Dedalus Healthcare Systems, Firenze, Italy), as Vendor Co-Chair for IHE-Europe. In addition he is a member of the IHE-Europe Steering Committee, the IHE International Board and is the IHE-Italy Vendor Co-Chair.

Commenting on the reappointment Dr Peter Mildenerger – IHE User Co-Chair and Associate Professor of Radiology at University Medical Centre Mainz, Germany – said, “I am delighted that Lapo has been reappointed as I have enjoyed working with him on many projects over the last few years and his managerial expertise has ensured that whatever Committee or initiative he is involved in it has a high degree of focus and his clear enthusiasm and passion for IHE remains undiminished despite having been involved with IHE activities from the outset of IHE’s infancy some 15 years ago”.

Lapo will also continue to contribute to the IHE-Europe Marcom Committee that has a strong mandate to promote the IHE brand, market IHE offerings in terms of IHE-Services and other initiatives and he leads the marketing activities and the performance of IHE across Europe, where there is huge potential for IHE to make a strong claim for itself.

Lapo said of his reappointment, “I feel privileged to serve IHE-Europe for a further period at a time when much of hard work over many years is really beginning to have an impact across a number of European Countries. National and Regional initiatives are recognising that IHE brings considerable value to the decision making process as part of procurement and there has never been a better time for vendors to participate in IHE at all levels knowing that their efforts and commitments will bring commercial rewards. Although I have been involved, through my company’s support for many years, there is no doubt in my mind that IHE profiles and their testing are the key to successful interoperability and educating users and vendors thereby getting that message across remains key for our marcom efforts”.

About IHE-Europe

The mission of IHE-Europe is to improve patient care by advancing the interoperability of healthcare IT systems and the appropriate sharing of relevant information. Towards that end, IHE-Europe conducts education, testing, demonstrations and other activities promoting the deployment within Europe of systems compliant with the IHE Technical Frameworks developed by IHE International. IHE-Europe also recruits healthcare professionals and solution developers to participate in the development of these specifications and promote their appropriate use in Europe. IHE-Europe interacts with relevant governmental and non-governmental organisations in Europe. It also maintains close contacts with similar initiatives around the world.
